

40kWh battery swapping station outdoor unit in the UAE region

Overview

NIO's Power Swap Station allows fully automated battery swaps in just three minutes. Located at Yas Marina Circuit, it supports Abu Dhabi's vision for sustainable transport. The plan will be developed in collaboration with Terra Tech Ltd, a MENA-based B2B micro-mobility. Drive Terra builds battery swapping infrastructure powering electric delivery fleets across the Middle East, Africa, and beyond. Unlike traditional charging stations, which require vehicles to wait for hours while the battery replenishes, swapping stations allow immediate battery. Abu Dhabi, United Arab Emirates, 27th May 2025: NIO, a global leader in premium smart electric vehicles, is redefining how drivers in the UAE power their EVs with the successful deployment of its Power Swap Station technology. This approach significantly addresses two pressing barriers to EV adoption: prolonged charging times and.
