

Agricultural solar power generation policy regulations

Overview

The Agrisolar Policy Map assesses six key policy areas: legal definitions, land use and zoning, support schemes, technical requirements, agricultural productivity, and environmental safeguards. Milan, ITALY (21 October 2025): SolarPower Europe has unveiled its new Agrisolar Policy Map, a comprehensive policy tool designed to benchmark agrisolar regulations across 18 EU Member States. The Map highlights best practices and regulatory gaps, aiming to accelerate the deployment of agrisolar solutions that support both energy and agricultural resilience. The “Agrisolar Best Practice Guidelines Version 2. Agrisolar integrates solar photovoltaic (PV) systems with agricultural. Solar and Agriculture in New York In 2019, New York State (NYS) adopted the Climate Leadership and Community Protection Act ('Climate Act'), a landmark bill which codified ambitious and comprehensive climate and energy targets for the State. The Climate Act established sweeping decarbonization. The policy map highlights that only five of the 18 EU Member States included in the tool have set a legal definition of agrivoltaics.
