

How many energy storage solar power plants are there in Uruguay

Overview

Around 19 large solar plants operate, including major ones like La Jacinta. 5 kWh per kW installed per day. Not a desert-level resource, but very viable. Uruguay generates solar-powered energy from 13 solar power plants across the country. How much electricity is generated from solar farms each year?

According to the latest data from the International Energy Agency (IEA), the global. There are 16 Solar photovoltaic power plants in Uruguay as of August, 2025. Our database covers major metropolitan areas including Sältö and Termas Del Arapey, which feature substantial concentrations of Solar photovoltaic power plants— 3 locations in Sältö and 1 in Termas Del Arapey. Sältö alone. Solar PV capacity grew from almost 0 MW in 2012 to over 240 MW by 2017. Growth drivers: Uruguay gets about 1,700 kWh/m²/year of sunlight, similar to Mediterranean countries. 2 gigawatts (GW) distributed across 73 power plants, the country has strategically focused on renewable energy sources, allowing it to reduce its dependence on fossil fuels and enhance energy security. CARACOLE 1 del PARQUE EÓLICO ING. GABRIEL TERRA This data is a derivative set of data gathered by source mentioned below. - Uruguay's Energy Supply & Demand: In 2024, Uruguay's energy mix was dominated by renewables (99%), with biomass leading at 53%. Total energy consumption rose to 6.
