

How much is one watt of solar in Paris

Overview

As of 2025, the typical price per installed watt (Wc) falls between 1. Adding battery storage increases the overall cost but offers significant energy autonomy benefits and Obligation d'Achat: surplus buyback at €0. The savings estimates shown are for informational purposes only and do not constitute financial advice. Actual savings depend on your specific installation, roof condition. The average yield in Île-de-France reaches 1,000-1,100 kWh/kWp/year, allowing a residential 3 kWp installation to generate 3,000-3,300 kWh per year. Regional comparison: While Paris produces 15-20% less than Lyon or Marseille, this difference is largely offset by other favorable economic factors. Explore estimated solar panel electricity production for various panel sizes in Paris. com to use our comprehensive calculator. Ready to design your full system?

Use our comprehensive solar sizing. Optimize your solar installation with PVGIS, the leading photovoltaic calculator! Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system?

PVGIS provides you with a detailed and precise simulation of your solar yield, regardless of. The price of a solar installation depends on several factors such as power (expressed in kilowatt-peak, or kwc), the technology chosen and installation costs.
