

Huawei paris solar energy storage integrated device

Overview

0 is a new integrated solar-plus-storage platform featuring smart inverters, AI-driven management, and grid-forming capabilities to turn solar plants into active grid-support assets. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. Huawei's Smart String Grid-Forming ESS ensures robust protection through five layers of integrated safety design, from individual cells, battery packs, racks, systems, and the grid. Built for reliability, this approach promises end-to-end safety throughout its lifecycle, covering manufacturing. Huawei has launched its latest PV + ESS product lineup, empowered by all-scenario grid-forming technology, which covers multiple application scenarios from residential to utility, at the exhibition. It boosts efficiency, reduces costs, and enhances stability in weak grids with high renewable. Huawei Digital Energy has unveiled its next-generation networked energy storage products and solutions during the Intersolar Europe 2025 event.
