

New battery procurement regulations in penang malaysia for energy storage

Overview

□□ Fundamental changes to the next LSS bidding process: The government has announced that the installation of BESS (Battery Energy Storage Systems) will be a mandatory requirement for large-scale solar power generation projects in order to improve grid reliability. Structured as a two-stage bidding process, the programme targets 400MW/1,600MWh of. At the turn of the 2026 new year, the Energy Commission of Malaysia (“ Energy Commission ”) released a series of new updates affecting the principal green electricity schemes available to renewable energy developers and electricity consumers in Peninsular Malaysia. This guideline outlines the certification process, applicable standards, and labelling requirements for BESS products in Malaysia — an important. Importing battery energy storage products into Malaysia requires strict compliance with certification and regulatory standards.
