

One trillion solar power generation concept

Overview

These observations have underpinned the creation of the International Solar Alliance (ISA), initiated by the Government of India with the objective of mobilizing \$1 trillion to deploy 1 trillion watts (1 terawatt) of solar energy systems in the developing world by 2030. To install one trillion solar energy refers to the ambitious goal of deploying solar power systems and related infrastructure capable of producing one trillion watts, or one terawatt, of energy from solar sources. This signifies a monumental commitment to renewable energy development, 2. Falling costs for solar energy and battery energy storage have made solar cost-competitive with fossil fuels and other renewable energy solutions. The fourth General Assembly of the ISA was held virtually between October 18 and October 21. one trillion watts or 1,000,000,000,000 watts.
