

# Photovoltaic panel grounding wire clip

## Overview

These grounding clips (also referred to as solar earthing plates) are used for bonding solar panels to aluminum rails, carbon steel, or racking systems. Compared to older grounding methods, our solar grounding clips offer a simpler and more cost-effective solution. Practical Set: Ensure the safety of your solar system with the Thunder Grounding Clip. Our universal solar grounding washers are suitable for roof. The innovative stainless steel grounding clip for PV module design eliminates the need to connect the ground wire to each individual module and does not require surface treatment on the anodized aluminum module. During installation, place the grounding clip at the clamping point or bolt connection. Looking for a good deal on pv grounding clip?
