

# Rooftop photovoltaic waterproof bracket

## Overview

Our weldable solar mount provides a secure, fully waterproof attachment for photovoltaic panels on TPO and PVC roofs. Solar energy systems thrive on durability – and nothing impacts longevity more than proper waterproof bracket installation. This guide explains industry best practices, common pitfalls, and innovative solutions to protect your PV investment against harsh weather. It is a new waterproof membrane made of thermoplastic polyolefin (TPO) synthetic resin that combines ethylene propylene rubber and polypropylene with advanced polymerization technology, and is added with antioxidants. Our innovative Heat-Weldable PV Mount is engineered specifically for commercial rooftops with single-ply TPO or PVC membranes. This non-penetrating support creates a permanent, molecular bond with the roofing material by utilizing a simple hot-air welding process. It forms a completely integrated. Choose our rooftop solar panel mounts for a more durable, efficient solar energy system! We offer superior product quality, hassle-free installation, and the best cost performance to ensure your investment lasts longer. Made of high-strength aluminum alloy and stainless steel, it has excellent. Features: Building Protection: The bracket dimensions are precisely calibrated, ensuring compatibility with common residential roof structures and photovoltaic module mounting hole positions, no additional drilling or modification is required, after installation, the strong fit guarantees. used for the waterproof of roof, car shed, sunshine shed and other supports.
