

Solar Photovoltaic Panel Value

Overview

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. The reference market is Europe, which pvXchange Trading has monitored since 2009 using a unique price index. The tool highlights sector trends by grouping products into three main categories: This segment includes panels with mono or bifacial heterojunction (HJT) cells, n-type TOPCon or back. Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system. How Much is it Worth?
