

# Solar power generation subsidy news

## Overview

Germany's solar subsidy programs shifted again in 2025-2026. Solarpaket I is now fully in effect, KfW restructured its battery grant program, and feed-in tariffs continue their scheduled monthly decline — which makes locking in current rates time-sensitive for homeowners and solar. Federal funds required to support the expansion of renewable energy in Germany could drop in 2025, according to an analysis by the Institute of Energy Economics at the University of Cologne (EWI). Support costs could recede to 18 billion euros, an increase of almost one billion euros compared to. These subsidies have contributed to Germany's goal of sourcing 80% of its electricity consumption from renewable sources by 2030. Feed-in subsidies were introduced 25 years ago to support the growth of the solar power sector. 11 ct/kWh (20 years), and state bonuses up to €6,000. Full guide with application steps. The energy policy debate is already increasingly focused on the Renewable Energy Sources Act (EEG) and future market prices, while the expansion of photovoltaics must accept new. BERLIN (Reuters) -Germany's solar industry warned on Tuesday against ending subsidies for new rooftop photovoltaic systems, as proposed by the economy minister, arguing that withdrawing support for small installations would jeopardise the country's climate goals.

Latest Power Generation News and Insights

Power generation industry updates, news, and insights including gas, renewables, coal, nuclear, energy storage, hydrogen, and more.

Germany's solar industry warns against subsidy cuts for rooftop

Germany's solar industry has raised concerns over a proposal by Economy Minister Katherina Reiche to end feed-in subsidies for new small-scale rooftop photovoltaic (PV) systems.

Germany's renewable support costs could drop in 2025 amid strong

Federal funds required to support the expansion of renewable energy in Germany could drop in 2025, according to an analysis by the Institute of Energy Economics at the University of

Germany Solar Subsidies 2026: KfW, EEG Tariffs & State Incentives

Germany's solar subsidy programs shifted again in 2025–2026. Solarpaket I is now fully in effect, KfW restructured its battery grant program, and feed-in tariffs continue their scheduled

Solar explained

Energy from the sun The sun has been producing energy for billions of years, and it's the original source for nearly all the energy we use. People have used the sun's rays (solar radiation) for thousands of

Solar Panels: Compare Costs, Reviews & Installers

SolarReviews is America's leading independent, unbiased, solar company and solar panel comparison website for homeowners considering installing solar panels on

Lazard Releases 2025 Levelized Cost of Energy+ Report

Renewables Remain Competitive: Unsubsidized Wind & Solar Lowest Cost Generation Sources for Last 10 Years Despite facing macro

Germany to scrap fixed tariffs for new renewables, pivot

Germany will phase out fixed-price subsidies for new renewable power projects and pivot to market-based support, aligning with European Union

PM-KUSUM 2.0 Scheme: Next Big Solar Scheme for

PM-KUSUM 2.0 Scheme explained with latest updates, expected features, subsidy details, and how it can benefit farmers with solar power in 2026.

New Energy Outlook 2026

The New Energy Outlook is BNEF's annual report focused on long-term energy and climate scenarios for the energy transition.

### Solar power in the United Kingdom

Solar power has a growing role in electricity production in the United Kingdom, contributing around 6.4% of the UK's annual power generation in 2025. As

Power tariff adjustment alone will not reduce subsidy burdens

Increased share of solar and renewable power projects if operated efficiently, can significantly reduce power generation costs and reduce BPDB's subsidy burdens.

### Solar Panel Price and Subsidy in West Bengal - 2026

In this article, we'll break down the Solar Panel Price in West Bengal, explore solar subsidy in West Bengal, and give you a brief overview of top solar panel manufacturers in West

German solar industry warns against ending subsidies after minister ...

Germany's solar industry warned on Tuesday against ending subsidies for new rooftop photovoltaic systems, as proposed by the economy minister, arguing that withdrawing support for

### Solar Energy

Solar energy is the fastest growing and most affordable source of new electricity in America. As the cost of solar energy

### The Energy Mix

Canadian independent, non-profit news agency reporting on the energy transition and how communities are making it happen.

Bangladesh's solar duty cuts set to ease grid pressure

Bangladesh's national grid has long struggled with high generation costs, heavy subsidy bills and unreliable supply in rural areas, and a sweeping set of solar import duty cuts announced in

PM Surya Ghar Yojana: Planning to install solar panels? Here's how

Launched to accelerate the adoption of renewable energy, the scheme offers substantial financial assistance to homeowners who install solar panels on their rooftops. With attractive subsidies and ...

### IRENA - International Renewable Energy Agency

The International Renewable Energy Agency (IRENA) is an intergovernmental organisation supporting countries in their transition to a sustainable energy future.

Latest | WWF

Solar power and women's power in the Amazon WWF-supported solar tech is helping women build stronger communities deep in Colombia's

German econ min considers phasing out subsidies for new small-scale ...

Germany's economy minister, Katherina Reiche, is considering to phase out the subsidy system currently in place for small-scale photovoltaic (PV) installations which feed electricity into the

Renewable Energy Received Record Subsidies in 2024

Renewable energy, particularly wind and solar power, is receiving substantial subsidies in many countries worldwide. Unfortunately, wind and solar energy are unreliable and very expensive,

The end of solar subsidies is drawing near

Solar subsidies are on the verge of being phased out. New EEG regulations, market prices, and reforms are fundamentally changing the financing of solar power. In parallel, the

Levelized Cost of Energy+ (LCOE+) | Lazard | Lazard

Lazard's 2025 LCOE+ report highlights that, despite headwinds and macroeconomic challenges, renewables remain the most cost-competitive form of new-build

Solar subsidies are driving up electricity costs

Solar subsidies are making electricity more expensive: feed-in tariffs, the EEG surcharge, and grid fees are rising, and shortages threaten during periods of low wind and solar power generation.
