

Survey on the current status of household solar power generation

Overview

The US solar industry installed 7.8 gigawatts direct current (GWdc) of capacity in Q1 2026, a 27% decline from Q1 2025 and a 42% decline compared with Q4 2025. The 30% Federal Solar Tax Credit for homeowner-owned systems is now set to expire on December 31, 2025. Due to typical project timelines, the window to start a new solar project and guarantee. More than one-third of U. solar power capacity is small-scale solar—a share that has been declining in recent years because utility-scale solar has been growing faster. Capacity has almost doubled in the last year. 5 million individual systems installed through the end of 2024 and provides project-level data covering a wide range of system technical characteristics, installed prices, financing and installer level data, and customer segmentation details, including. The US solar industry installed 7.
