

Tesla rooftop solar power plant

Overview

This new development is located near Cheyenne, Wyoming, and will feature a 365-megawatt (MW) solar farm paired with a 200 MW/1,600 megawatt-hour (MWh) battery energy storage system, also known as BESS. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more. Learn more about the installation process, from design to power on. During the company's Q3 2025 earnings call, Vice President of Energy Engineering Michael Snyder revealed that production of a new residential solar panel has started at Tesla's Buffalo, New York facility, with shipments to customers beginning in the first quarter of 2026. Nearly a decade later, Tesla has installed roughly 3,000 Solar Roof systems total, stopped reporting. The Tesla Solar Roof tiles are still alive, but the product is on the back burner at Tesla as it failed to achieve its promises.
