

# Ukraine cabinet solar energy storage cabinet system project

## Overview

**Project Overview** The system comprises 4 units of 50kWh + 2 units of 100kWh energy storage cabinets, delivering a total capacity of 400kWh. Located in the Kyiv region of Ukraine, this project is designed for a local factory to ensure uninterrupted production during power outages. With a total investment of €140 million, this project is not only Ukraine's first large-scale energy storage. On September 3, at the Forum “Charge and Earn: How ESS Are Changing the Rules of the Game in Ukraine's Energy Market”, organized by the Solar Energy Association of Ukraine (SEAU) and JSC Market Operator, SEAU partner - DTEK Renewables - announced the launch of the largest energy storage system. This case study presents the real-world operation of a GSL ENERGY 160kW / 418kWh liquid-cooled energy storage system deployed at a customer site in Ukraine, where winter conditions include prolonged low temperatures and snow/ice coverage. Equipped with photovoltaic surge protection devices, overload protection, and high-quality electrical systems to guarantee user safety during.
