

# Victorian residential energy storage 2025

## Overview

Supporting Victorians to buy home batteries and hook them into a virtual power plant (VPP), as part of a suite of initiative – including more big batteries and deeper storage – to help the state manage its transition from coal and meet its ambitious renewable energy targets. Discover how home battery storage can cut bills, boost energy independence, and qualify for Victorian rebates. Victoria's clean energy transition is accelerating, and households are at the centre. At the centre of Australia's electricity network, the state of Victoria is leading the way to a renewable energy future. We estimate that Victoria will need 25 GW of new generation and storage capacity by 2035. <sup>1</sup> Our legislated renewable energy generation, energy storage and emissions reduction targets provide a clear market signal, supported by government programs to drive investment. The recommendation for. The Victorian Government has officially wrapped up its direct incentives for home batteries — and in their place, a powerful new national program is stepping in.

## Article Content

Victoria urged to back home batteries and more deep storage, and do

Draft strategy says batteries of all sizes - and deep storage - are critical to Victoria's future energy infrastructure. And it calls for all replacement appliances to be electric.

Victoria's Investment Prospectus ENERGY STORAGE

With 740 MW of existing storage capacity and 2,028 MW under construction as of June 2025, there are still significant opportunities for investment to help meet Victoria's ambitious storage targets.
