

West Africa Deep Energy Storage Project

Overview

Independent power producer Africa REN has officially commissioned the Walo Storage project in Bokhol, Dagana department, northern Senegal. This marks the first solar PV installation in West Africa to integrate battery storage dedicated to frequency regulation. Delivered on time, the Bokhol site is already connected to Senelec's grid for energy delivery. Walo Storage marks a major milestone. Dakar, Senegal, July 16, 2024 - Africa REN, a leading developer of renewable energy projects in sub-Saharan Africa, announces the commencement of construction of Walo Storage, an innovative lithium battery energy storage unit. Located in Bokhol, Senegal, Walo Storage is the first battery storage. The West African nation, where over 60% of the population have access to electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. Why?

Because the region's energy landscape is shifting faster than Sahara sands in a harmattan wind. Launched on May 22 in the southern Kolda region, the hybrid plant will generate 60 megawatts of solar power and store up to 72.
